

Good day,

Vessel recently updated JOT Application from Version: 3.35.36 build: 31-Mar-2023 to Version: 3.35.46 build: 08-Oct-2023 as shown in picture below.

Following are the issues associated with new JOT Application:

## 1. OPERATIONS

- During creating NOON Report, when selecting location for eg. ALONGSIDE, ANCHORAGE or AT SEA, the interface use to change from AT SEA to BERTH/ ANCHORAGE as shown in 1<sup>st</sup> picture below. But with New version, no matter what location is selected the interface remains same that is AT SEA.
- When report edited with PORT details and saved and closed, and when opened the same Report again, port details automatically gets deleted from the report, no matter how many times you input.
