Corrective Action

Immediate action:

1. Reported to office & all relevant parties.
2. Notification made to nearest port control & VTS.
3. Procedure followed for NUC (Not under command) as per ROR.

Planned action:

1. In coordination with office, Commenced preparing Towage operation to the port of Malaga.
2. Continuous monitoring of Set & drift and prepare the vessel for emergency anchoring.
3. To Open up Pump cover for further inspection and to establish the actual cause of damage.
4. Service Technician to be arranged for carrying out required repair.

Preventive Action

1. Increasing safety margin for inspection – PMS routines for H/T cooling water system has been reduced from 12000 hours to 9000 hours to ensure required maintenance of cooling water pump has been carried out well before the recommended period of 12000 hours as advised by the manufacturer.
2. Routine maintenance of Cooling water system to be performed regularly under the strict supervision of C/E, Any abnormality identified during the course of inspection must be attended with great care.
3. Incident reports & learnings must be shared with the fleet vessels.
